DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Species III (Fig.5, claims 1-14) in the reply filed on 8/2/2006 is acknowledged. The traversal is on the ground(s) that it would be more expedient to prosecute all of these claims together. This is not found persuasive because the inventions are independent or distinct as described in the election/restriction requirements.

The requirement is still deemed proper and is therefore made FINAL.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-14 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 34-38 of U.S. Patent No. 6,554,198 in view of Nicolson et al. (U.S. Patent Number 6,264,111). '198 claims all the limitations in the application of 10/804,278 except the temperature sensor located at the air-discharge. Nicolson et al. disclose

Art Unit: 3744

the sensor can either located in the room or air-discharge in the same field of endeavor for the purpose of desired control parameter. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the apparatus of '198 with a sensor at air-discharge in view of Nicolson et al. so as to have an alterative control parameter.
